The Story

CAPS is a conscript I stumbled on while browsing the site omniglot.com. It's a simple way of writing English letters and numbers. But man does it look neat!

According [to the CAPS website,](to the CAPS website) this script was written by Destin Hubble as an alternative alphabet for English. It is a way of writing the English language in all caps instead of the standard way. Destin found that writing in all caps is often much clearer but many parts of it still made it look too complex.
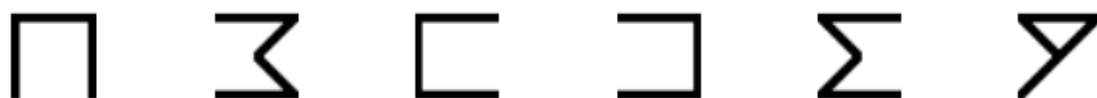

Destin attempted to simplify regular caps by confining them to shapes that can be made from a box with an x inside it. All of these shapes were further refined into letters by confining them to groups of shapes that were all the same apart from orientation.

This script accomplishes 3 things:

1. It looks cool
2. It's easy to remember
3. It's instantly readable
